## Workshop on Spoken Languages Technologies For Under-resourced languages

This **International Workshop on Spoken Languages Technologies for Under-resourced languages (SLTU)** will be held at **Hanoi University of Technology**, Hanoi, Vietnam, May 5 - May 7, 2008.

The SLTU meeting is a technical conference focused on spoken language processing for under-resourced languages. This first workshop will focus on **Asian languages**, and the idea is to mainly (but not exclusively) target languages of the area (Vietnamese, Khmer, Lao, Chinese dialects, Thai, etc.). However, all contributions on other under-resourced languages of the world are warmly welcomed.

The workshop aims at gathering researchers working on:

- ASR, synthesis and speech translation for under-resourced languages
- portability issues
- fast resources acquisition (speech, text, lexicons, parallel corpora)
- spoken language processing for languages with rich morphology
- spoken language processing for languages without separators
- spoken language processing for languages without writing system
- ...
